

Data Science for the Biomedical Sciences Virtual Workshop Series

Dates:

October 20th and 22nd

workshop split over two days, must attend both

Time:

12:30pm - 3:00pm EDT

Are you a clinician, student, researcher, or analyst who...

- Wants to learn about creating and processing databases for analysis?
 - Found previous guides on spreadsheets and programming not relevant to your field?
 - Is preparing for a biomedical study?
-

If so, register for part 1 of a biomedical foundational data science skills workshop series.

In part 1 we'll cover:

- | | | |
|-----------------------------|------------------------------|-----------------------------|
| • Working with spreadsheets | • Fitting statistical models | • Cleaning and tidying data |
| • Loading data into R | | • Plotting in ggplot2 |
-
