Pre-Workshop Exercise Exercise 1 Exercise 2 Exercise 3 Summative

Pre-Workshop Exercise

Please write the code for the following pipeline steps:

- 1. Load the tidyverse and readxl libraries.
- 2. Read in the Excel file located in: "data/medicaldata_tumorgrowth.xlsx" into a variable tumor.
- 3. Select the all the columns except <code>Grp</code> , and filter the rows such that Day is <code>0</code> or <code>20</code> . Save this data subset into a variable <code>tumor</code> subset .
- 4. We want to compare baseline tumor sizes (Day 0) with tumor sizes at Day 20 between each of the groups.
 - Using tumor_subset, calculate the average
 tumor Size for each Grp and Day.
- 5. Save tumor_subset into a CSV file located in "data/tumorsubset.csv".
